

 Explorer Marine SBoSS ApS	QUALITY POLICY	Rev.02
--	------------------------------	----------------------

QUALITY POLICY

EXPLORER MARINE SBOSS operates in the offshore field and provides services including the marine survey, positioning and maintenance.

The Quality Policy represents the commitment of the Management to achieve the company targets through the application to all the activities of an effective and efficient Quality Management System which reflects the requirements of the main international standards.

The above services are provided by understanding the customer requirements and expectations and by using equipment and systems technologically advanced. A constant monitoring of the provided performances allows to implement the appropriate actions to preserve an high level of Quality of the service in order to achieve the **customer satisfaction**.

The company uses adequate processes of selection and evaluation and a consequent training programme in order to guarantee that all the jobs are carried out by **high competence personnel**. Employees are encouraged to apply the guidelines of the Quality Management System during the development of all the activities.

The company believes that **suppliers reliability** is an essential requirement for the provision of services to be realized by selecting those suppliers which refer to the same principles adopted by the company in relation of Quality.

Company and employees have to comply with all mandatory National and International rules / regulations and guidelines or codes as well as the **organization internal rules**.

Such policy is disseminated within all the levels of the organisation and the its relevant work's areas in order to make aware our people, customers and suppliers of the values which lead our work.

Birkerød 3th March 2017
